

*Photoluminescent Safety Signages
(Glow in the Dark)*

ARPIT MARKETING

arpitmarketing05@gmail.com

Photoluminescent materials can be used for many safety applications. including -

1. Life saving equipment identification
2. Fire safety signs
3. Health and safety signs
4. Escape route marking
5. Low location illumination
6. Directional route marking tape

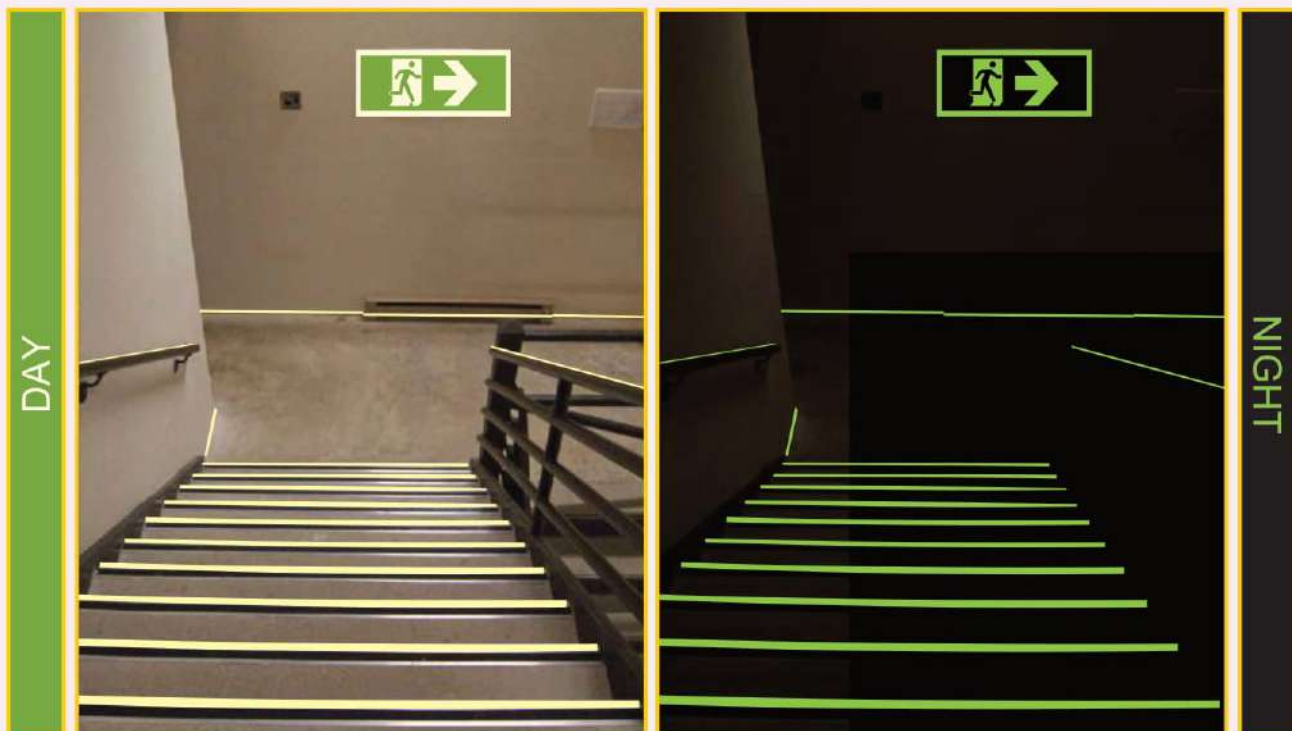

The materials have already been successfully applied in the following sectors :

- | | |
|--------------------|-----------------------|
| 1. Corporate House | 6. Power plants |
| 2. Hospitals | 7. Theaters |
| 3. Factories | 8. Hotels |
| 4. Warehouse | 9. Amusement park |
| 5. Hostel | 10. Auditoriums, etc. |

The materials are also suitable for use in a wide range of commercial applications.

Important fire Safety equipment such as Fire Extinguisher, Fuse boxes, valves and other important cannot be located. Such a situation leads to increase of risk to manifold. All the signages are made with Photoluminescent material which illuminates a clear and visible glow when there is darkness due to power cut.

It has long life as it does not need internal or external wiring / electricity supply. It is water proof, vapor, explosion proof, corrosion proof, mold proof, fire retardant and non radioactive.

PROHIBITION
